Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a countertop assembly, classified in class 52, subclass 782.2.
 - II. Claims 4-6, drawn to a method of manufacturing a countertop assembly, classified in class 52, subclass 741.1.

The inventions are distinct, each from the other because of the following reasons: Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The method of Group II does not require a countertop assembly having the recited features of group I. Further, different countertop with alternative features is capable to be used in the process.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3635

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Affirmation of this election must be made by applicant in replying to this Office action.
